Cut out & keep

Enriched with tomato feed

**Tomato Planter**  
Enriched with tomato feed

**Tomato Planter**

**1. WHAT IS IN THE PLANTER...**

Gro-Sure® Tomato Planter is a nutrient-rich compost that promotes strong root growth and sustains healthy plant development. It is enriched with potash for improved crop quality and abundant fruiting.

Gro-Sure's unique moisture retention technology reduces the risk of blossom end rot and actively feeds the tomato plants for 6 weeks.

**2. HOW TO START...**

- Before opening, shake the planter to loosen the compost and ensure an even depth
- Choose a suitable spot with plenty of light. Gro-Sure® Tomato Planter is ideal for greenhouses, patios, conservatories and even roof top plantings
- Cut around the dotted lines on the front of the planter to make 3 holes
- Make a hole in the compost sufficient for the root ball of the plant and firm in the compost around the plant
- Water the planter and ensure the compost is moist

**3. NOW START GROWING...**

- Keep compost moist. Water every day in hot weather to prevent drying out
- If necessary, cut some holes in the bottom of the planter to avoid water logging
- Use Gro-Sure® Tomato Food when the first flower truss appears and re-feed every 2-3 waterings
- Carefully place a cane (or use string and supports) in the compost to support the plant as it grows

**TOP TIPS...**

- Store in a dry frost free space away from weedkillers and other garden chemicals.
- Keep planter sealed until it is required for use.

**HEALTH & SAFETY ADVICE**

- Use in a well ventilated place and avoid breathing in dust.
- Always wear gloves when gardening and then wash hands after use.
