Tomato Gro-Pack

1. WHAT IS IN THE GRO-PACK...

Gro-Sure® Tomato Gro-Pack One Plant is a nutrient-rich compost that promotes strong root growth and sustains healthy plant development. It is enriched with potash for improved crop quality and abundant fruiting.

Gro-Sure's unique moisture retention technology reduces the risk of blossom end rot and actively feeds the tomato plants for 6 weeks.

2. HOW TO START...

- PLANT DURING**
- 
- Before opening, shake the Gro-Pack to loosen the compost and ensure an even depth
 - Choose a suitable spot with plenty of light. Gro-Sure® Tomato Gro-Pack is ideal for greenhouses, patios, balconies, conservatories and even roof top plantings
 - Cut around the dotted lines on the front of pack to make a planting hole
 - Make a hole in the compost sufficient for the root ball of the plant and firm in the compost around the plant
 - Water the Gro-Pack and ensure the compost is moist

3. NOW START GROWING...

- Keep compost moist. Water every day in hot weather to prevent drying out
- If necessary, cut some holes in the bottom of the Gro-Pack to avoid water logging
- Use Gro-Sure® Tomato Gro-Pack when the first flower truss appears and re-feed every 2-3 waterings
- Carefully place a cane (or use string and supports) in the compost to support the plant as it grows

TOP TIPS...

- Store in a dry frost free space away from weedkillers and other garden chemicals.
- Keep Gro-Pack sealed until it is required for use.
