

Aftercut ALL IN 1 NE

Westland Autumn Lawn Feed & Moss Killer is specially formulated as a granule to keep your lawn strong and healthy over the winter months. This 80sq.m box is ideal for use with the Westland wheeled lawn spreader for a quicker, more even application.

WHERE AND WHEN TO USE

FOR USE ONLY AS A HOME GARDEN FERTILISER AND MOSSKILLER. TO AVOID RISKS TO MAN AND THE ENVIRONMENT, COMPLY WITH THE INSTRUCTIONS FOR USE. For use on lawns.
For best results apply between early September and mid November. Apply on a dry day when lawns are actively growing, the grass is dry and the soil is moist. Do not apply within 3 days before or 4 days after mowing. Apply on a calm day and do not allow drift onto the foliage of neighbouring vegetation. Do not apply during drought or when frost or rain is expected. Do not use more than 2 times in any one season. Drift: Do not allow product to contact the foliage of neighbouring vegetation.
New lawns: Do not use on newly sown lawns or newly laid turf until established for twelve months.

HOW TO USE

It is important to apply lawn care products evenly to avoid variations of growth across the lawn. It is good practice to wear gloves when using the product although this is not a requirement. Maximum individual application: 35g of product per sq.m.
This pack treats 80sq.m (8 parking spaces).
1 parking space = 2m x 5m, which is 10sq.m.

How to apply by hand

Mark out the area to be treated using canes or string. With a gloved hand apply 35g per 1sq.m (1m x 1m) evenly over the lawn surface. One handful equals about 35g.

Wheeled Spreader

For best results on larger lawns apply with a wheeled spreader.
• Adjust the calibration on your spreader to apply 35g per square metre, check instructions for details.
• Simply fill your spreader and apply as normal.

WARNING: If spilt on paving, slabs, tiles, decking or clothing etc brush off immediately to avoid staining or discolouration. Do not wash surfaces clean as this can cause staining. Avoid walking or allowing pets on treated areas until it rains or the product has been watered in. We recommend waiting for the product to be fully dry before walking on the lawn. Walking the granules onto a patio, decking or into the house may cause staining.

WHAT TO EXPECT

Your lawn should thicken and become a lush green colour. The moss in the lawn will blacken as it dies (any blackening of the grass is only temporary). Thoroughly rake out the dead moss 7-14 days after treatment. Fill any bare or thin patches using Westland Gro-Sure[®] lawn seed.
