MIX

Resolva

100ml e Sachet

XTRA TOUGH

TREE STUMP KILLER LIQUID SACHET

FOR USE ONLY AS A HOME GARDEN WEEDKILLER

TO AVOID RISKS TO MAN AND THE ENVIRONMENT, COMPLY WITH THE INSTRUCTIONS FOR USE.

Resolva Xtra Tough Tree Stump Killer Liquid Sachet is a systemic total herbicide containing glyphosate. It kills tree stumps and perennial broad leaved weeds such as Bindweed, Brambles, Buttercup, Common Nettle, Creeping Thistle, Dandelion, and Field Bindweed. Perennial grasses such as couch grass, annual grasses and broad leaved weeds are also controlled.

INSTRUCTIONS FOR USE

HOW TO USE

For larger trees and shrubs use Resolva Xtra Tough Tree Stump Killer Liquid Sachets by cutting and stump treatment. For smaller shrubs and woody weeds (such as Brambles) below 1 metre in height cutting is not always necessary and Resolva Xtra Tough Tree Stump Killer Liquid Sachets can be diluted and applied as an overspray. For other annual and perennial weeds apply Resolva Xtra Tough Tree Stump Killer Liquid Sachets as an overspray.

Stump Applications (Ready To Use):

Cut open the sachet and pour evenly across the cut surface of the stump as soon as possible but not later than a week after felling. A 100ml dose will treat up to 3 stumps of 10-15cm diameter. Please note Resolva Xtra Tough Tree Stump Killer Liquid Sachets will not cause tree stumps to degrade, following treatment dead stumps will decay naturally.

Tough Weed Application (Dilution Required):

Cut open the sachet and pour the contents of the 100ml sachet into a garden sprayer and dilute with clean water to make 1 litre of spray. Spray weed leaves lightly until wet, but avoid run-off of the liquid. For perennial grasses, broad leaved weeds and other woody weeds (e.g. Brambles), 1x 100ml sachet treats up to 66 sq.m.

Contains Glyphosate 72 g/l, soluble concentrate

AFTER USE

Ensure that garden sprayers are thoroughly cleaned after application as traces of Resolva Xtra Tough Tree Stump Killer Liquid Sachets left in the equipment can damage or destroy plants sprayed later.

WHEN TO USE

- Unwanted tree or shrub stumps should be treated between November and March to avoid application when the tree sap is rising.
- For tough weeds apply from March to October when weeds are actively growing and have a large leaf area allowing plenty of weed killer to be absorbed. Effects may be seen within a few days but full control can take up to 4 weeks.
- If it rains within 6 hours of application, then effectiveness may be reduced and re-treatment is recommended. Very persistent weeds may require repeated treatments once new growth appears.

WHERE TO USE

Resolva Xtra Tough Tree Stump Killer Liquid Sachets is a non-selective weedkiller. Avoid all contact with wanted plants. DO NOT apply to lawns or other wanted plants unless you want to kill them. Take extreme care to avoid spray drift as this product kills all green plant growth, including grass!
