BUG KILLER
CONCENTRATE

KILLS MORE PESTS
ON FLOWERS, FRUIT & VEGETABLES

WHITEFLY APHIDS CATERPILLARS
...plus many more!

MAPP 16220 PCS No. 04076

FOR USE ONLY AS A HOME GARDEN INSECTICIDE
Resolva Bug Killer Concentrate is fast acting and can be used to control a wide range of difficult pests on over 30 types of fruit, vegetables and flowers (please see table on side of pack). It can be used either indoors, including greenhouses or outdoors and will keep working for up to 2 weeks.

INSTRUCTIONS FOR USE
Where to Use:
Resolva Bug Killer Concentrate controls aphids (greenfly and blackfly), beetles, bugs (lygus), blossom weevils, capsids, caterpillars, cutworms, cabbage stem weevil, clay-coloured weevil, carrot fly, leaf-curling midges, leaf beetles (including rosemary beetle and lily beetle), pea midge, pea moth, pea and bean weevil, pear sucker, sawflies, scale insects, thrips and whitefly. Resolva Bug Killer Concentrate also gives a reduction in the numbers of mealybugs. For details on what crops Resolva Bug Killer Concentrate can be used on see the table on the side of pack.

When to use:
Resolva Bug Killer Concentrate can be used all year-round. For best results treat when infestation or symptoms are first seen. For pea moth where there is a history of damage from this pest, apply during flowering. For carrot fly apply to control adult flies after emergence and before eggs are laid. For further information on timing visit www.gardenhealth.com. For whiteflies, scale insects, mealybugs and thrips repeat applications may be required; 1-2 applications should be made at intervals of 7-21 days (except in tree crops where only 1 application is permitted). Do not use more than 2 applications per infestation or per crop.

How to use:
Not known to be hazardous to plants. No sensitive plant species or varieties are known. For best results spray plants during the late afternoon or early evening. Avoid spraying in direct sunlight or when plants are under stress e.g. from drought, frost, heat or overwatering. Before treating exotic plants or large areas of the same plant species, undertake a test for damage on one plant and observe for effects over a 10-day period.

• Shake well before use • To make up 1 litre of spray solution: Unscrew the measuring cap off the bottle and pour 20ml of the concentrate into the pressure sprayer, add one litre of water and mix thoroughly • Spray infested plants until visibly wet, but before spray runs off the leaf • Spray both the upper and lower leaf surface.

For the following pests use these spray volumes:
Whitefly 300ml – 666ml per 10 sq.m; Pear Sucker 300ml – 600ml per 10 sq.m; Carrot Fly 1000ml per 10 sq.m. For all other pests use 300ml – 500ml per 10 sq.m. Wash out equipment thoroughly after use.

Not recommended for control of whitefly on cucumbers and courgettes. Pesticide resistance in glasshouse whitefly, pear sucker and some aphids is widespread. Where resistant pests are present this product is unlikely to give control. Keep children and pets away from treated area until the spray has dried. May cause tingling/numbness (paraesthesia) if exposed areas are contacted. The effect is transient and may last up to 24 hours.

Where to use:

Crop	Minimum spray interval (days)	Harvest interval (days)	Maximum rate of spray solution (ml/10sq.m)
Fruit			
Strawberries, Grapes	14	7	667 (½ litre)
Blackcurrants, Redcurrants, Gooseberries	21	14	500 (½ litre)
Blackberries, Raspberries	21	28	500 (½ litre)
Apples, Pears	*	7	667 (½ litre)
Cherries, Plums & other Stone fruit	*	7	500 (½ litre)
Chestnuts, Hazelnuts (inc. Cobnut & Filbert), Walnuts	*	14	667 (½ litre)
Vegetables			
Beetroot	14	3	500 (½ litre)
Carrots	10-14	14	1000 (1 litre)
Parsnips, Turnips & Swede	10-14	14	667 (½ litre)
Celery	7	14	667 (½ litre)
Radishes	7	7	667 (½ litre)
Tomatoes (indoors & outdoors) & Aubergines (indoors only)	12	3	667 (½ litre)
Peppers (indoors only)	12	3	667 (½ litre)
Cucumbers & Courgettes (Zucchini) (outdoors only)	12-14	5	500 (½ litre)
Cucumbers & Courgettes (Zucchini) (indoors only)	10-14	3	500 (½ litre)
Sweetcorn	7	7	667 (½ litre)
Cabbages, Broccoli (inc. Calabrese), Cauliflowers & Brussels Sprouts	10-14	7	667 (½ litre)
Lettuces, Curly Endive & other salad plants (inc. leafy Brassicas) (outdoors only)	10-14	7	500 (½ litre)
Herbs (outdoors only)	10-14	7	500 (½ litre)
Dwarf French Beans, Runner Beans & Navy Beans	10-14	3	500 (½ litre)
Broad Beans	7	7	500 (½ litre)
Peas	12-21	3	500 (½ litre)
Celery, Fennel	14	7	500 (½ litre)
Potatoes	7	14	500 (½ litre)
Ornamentals			
Flowering & herbaceous shrubs, potted plants & flowers	14	None	1000 (1 litre)

*Treat only once per year
