Natural
**Slug Blocker
 Granules**
 The natural & effective way
 to protect plants

Earth Matters Slug Blocker Granules are a ready to use granule that can be applied directly from the pack. They can be used around edible and ornamental plants to protect against slug and snail damage. The granules can also be used as a decorative border around plants and in pots.

INSTRUCTIONS FOR USE

To protect individual plants
 Check that the area to be treated is free from slugs. Place a heap around the plant to be protected using about 10g of the product to produce a layer approximately 2cm deep. Spread the product right up to the stem of the plant.

To protect a group of plants
 Draw a line around the plants to be protected, check the area inside this line is free from slugs, spread a line of the granules around the plants making a barrier approximately 2cm wide and 2cm deep.

To protect container grown plants
 Check that the surface of the container is free from slugs and apply the product as a mulch creating a layer 2cm deep in the container, touching the stems of the plants.
