

ERAZA Ant Killer Powder is specially formulated to quickly and effectively kill ants and their nests. Used indoors and outdoors, it will provide long lasting protection for up to 3 months. It can also be used for effective control against flying insects such as wasps when the powder is dusted onto breeding or resting sites.

DIRECTIONS FOR USE

- Shake well. Remove cap.
- Point bottle downwards, squeeze and apply a fine dust to the treated area.
- Replace cap after use.

HINTS AND TIPS FOR BEST RESULTS

For flying and crawling insects. Apply at monthly intervals to resting and breeding sites as instructed below.

Ants

- Dust along ant runs and in cracks where ants congregate. Nest entrances should be dusted liberally.

Wasps

- Apply dust liberally to the nest entrance. Treatment should be carried out in the evening when wasp activity is at its minimum.

Fleas & Lice

- Apply as required in animal bedding, kennels and domestic premises.

Other Insect Pests

- Apply dust in and around insect hiding places and pathways, paying particular attention to cracks and crevices where insects settle.

Under normal circumstances it should not be necessary to repeat the treatments within 14 days. Persistent control for several weeks and up to three months can be obtained from one application, in the right conditions.

PRECAUTIONS

To avoid risks to man and the environment, comply with the instructions for use. *Do not breathe dust. *Do not contaminate foodstuffs, eating utensils or food contact surfaces. *This material and its container must be disposed of in a safe way. *Avoid contact with skin. *Do not empty into drains. *Do not contaminate waterbodies or watercourses with chemicals or used container. *Do not apply directly to animals. *Exclude animals during application. *Do not apply to clothing. *Remove or cover all fish tanks and bowls before application. *Cover all water storage tanks before application. *Wash hands and exposed skin before meals and after use. *Keep only in original container. *Keep in a safe place. *Remove excess dust from treated fabrics and air thoroughly before use. *Keep out of the reach of children. *All bats are protected under the Wildlife and Countryside Act 1981. Before treating any structure used by bats, consult Natural England, Scottish Natural Heritage or the Countryside Council for Wales. For Ireland: all bats are protected under Schedule 5 of the Wildlife Acts (1976 and 2000). Before treating any structure used by bats, consult the National Parks and Wildlife Service. *Hazardous to bees.
