**Gro-Sure** 5 Day Repair LAWN SEED

A combination of quality grass seed & fertiliser ideal for tired looking lawns or patches in need of repair.

**Existing lawn**

- 1 Remove any weeds  
Mow the lawn closely  
If the ground is compacted aerate using a garden fork
- 2 Spread Westland Lawn and Turf Dressing to fill any shallow holes and to level-out the surface
- 3 Shake the box to mix up the seeds  
Sprinkle in 2 passes at right angles to each other at rate of 50g/sq. m
- 4 Lightly rake into the surface

**After Sowing**

Lightly firm the ground by walking over it or use a roller. This will press the seed into the soil. Water thoroughly. Use a fine-rosed watering can or sprinkler. Take care not to wash the seeds away. Water daily until established. In very hot conditions water late in the day once the sun has gone down. It is better to water thoroughly once rather than several times lightly.

Mow for the first time when grass is 5-8cm high. Gradually lower the cutting height to about 2.5cm.

After 8 weeks we recommend feeding with Aftercut 3 Day Green Lawn Feed.

**When to sow**

- Lawn seed may be sown from March to October. Ideally sow during March to May or September to October.
- **Tips**
  - 4-5 days before sowing, lightly rake in Westland Growmore.
  - When preparing to sow, if the soil is dry water it thoroughly the day before and leave to soak overnight.
  - The top of the soil should be dry with moist soil just below the surface on the day of sowing.

**Unique Seed Coating**  
• Excellent bird deterrent  
• Shows where seed is sown

**Micro-Nutrient Coated Seed**

Gro-Sure® Lawn Seed is coated to significantly improve germination and for quicker establishment

- Excellent bird deterrent
- Organic compounds attract and retain moisture around the seed
- Micro nutrients for strong healthy rooting and rapid establishment
- Larger, heavier seed gets right down to soil surface for improved germination
- Plant hormones to stimulate growth

\*When creating a new lawn, this pack treats 10 sq. m (1 parking space). 1 parking space = 2m x 5m, which is 10 sq. m.

**EC FERTILISER**

NK (MgO 50g) fertiliser containing urea formaldehyde with micro-nutrients 15.0-3.5-14.0 (3-32)	Potassium oxide soluble in water (K <sub>2</sub> O) 14.0% (11.6%K)	<b>ADDITIONAL INFORMATION</b> For nutrient levels where these fall below the stated minimum requirements of The Fertiliser Regulations
Nitrogen (N) 15.0%	Magnesium oxide soluble in water (MgO) 3.0% (1.8% Mg)	Phosphorus pentoxide soluble in neutral ammonium citrate and water (P <sub>2</sub> O <sub>5</sub> ) 3.5% (1.5% P)
Ammoniacal nitrogen (N) 6.8%	Sulphur trioxide 0.025%	Phosphorus pentoxide (P <sub>2</sub> O <sub>5</sub> ) 3.0% (1.3% P) soluble in water
Urea nitrogen (N) 3.7%	Total iron (Fe) 1.0%	
Urea formaldehyde nitrogen (N) of which 1.7% soluble in hot water only (N) 1.6%	Total manganese (Mn) 0.001%	
	Total molybdenum (Mo) 0.002%	
	Total zinc (Zn) 0.02%
