## 8.1.5 Risk management measures according to used control banding approach: N/A

## 8.2 Exposure Controls

**Respiratory Protection:** Not necessary if room is well ventilated  
Use suitable dust respirator if dust concentration is high (Filter P2)

**Hand Protection:** Wear suitable gloves complying with EN420 if a risk assessment indicates this is necessary

**Eye Protection:** Wear safety glasses complying with EN166 as a minimum if required.

When selecting personal protective equipment, seek appropriate professional advice. Personal protective equipment should be certified to appropriate standards

## 8.2 Exposure Controls

**Engineering Measures:** Containment and/or segregation is the most reliable technical protection measure if exposure cannot be eliminated.  
The extent of these protection measures depends on the actual risks in use.  
If airborne mists or vapors are generated, use local exhaust ventilation controls.  
Assess exposure and use any additional measures to keep airborne levels below any relevant exposure limit.  
Where necessary, seek additional occupational hygiene advice.

**Protective Measures:** The use of technical measures should always have priority over the use of personal protective equipment  
When selecting personal protective equipment, seek appropriate professional advice  
Personal protective equipment should be certified to appropriate standards
