

TECHNICAL FACT SHEET - LAWNS

V2-01/12/2021

LAWN REVIVE

NATURAL LAWN THICKENER

BENEFIT

- Greens in just 3 days
- Improves soil
- 50% more seed*
- Gives a greener & thicker lawn

*vs Aftercut Lawn Thickener

KEY POINTS

- Greens and thickens lawns
- Mix of natural fertiliser, soil enhancer and grass seed
- Fills patches
- Low scorch risk
- With water management granules
- Child and pet friendly
- Bio-stimulants release energy to help seed germination.

APPLICATION RATE

APPLICATION METHOD		APPLICATION RATE
Apply by hand		35g-50/m ²
Apply by Spreader		35g-50/m ²

Estimate the size of your lawn to help prevent over-application.

Adjust the spreader setting and calibrate to apply the correct rate. Visit www.gardenhealth.com for spreader setting guidance.

WHERE TO USE

Do not apply during drought or freezing conditions or when frost is expected

For use on lawns

NPK VALUE: 3-1-2 + 12% Lawn Seed

WHEN TO USE

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC
	✓	✓	✓	✓	✓	✓	✓	✓			

Apply every 3-4 weeks when grass is actively growing.

For the best results:

Scarify and aerate the lawn early and late season.

Apply after mowing and remove the clippings for soil contact.

EXPECTED RESULTS

- The lawn will green up in 3 days, when applied at 50g/m²
- Stronger, healthier grass will start to outcompete weeds & moss.
- Friendly bacteria breakdown dead organic matter.
- Wetting agent granules allow for better water penetration and improved nutrient uptake.
- Multiple applications will improve and amend the soil over time.

INSTRUCTIONS FOR USE

APPLICATION: Apply the granules evenly to ensure the same result across the whole lawn.

For lawn maintenance—apply evenly at 35g/m² every 3-4 weeks

For tired or sparse lawns—apply at 50g/m² to increase the amount of seed and feed applied.

BY HAND: Sprinkle 35 grams per square metre over the marked area.

BY WHEELED SPREADER: Apply at a rate of 35 grams per square metre with a suitable spreader.

TOP TIP: For outstanding results you can safely double the application rate. Water thoroughly after application.

Why use Westland LawnRevive?

Westland Lawn Revive is the total solution for sparse & tired lawns

SPARSE & TIRED LAWN BEFORE TREATMENT

- ✓ Patches
- ✓ Thatch layer
- ✓ Yellowing lawn
- ✓ Shallow roots
- ✓ Compacted soil

Seed Germination
Bio-stimulants release energy in the seed to boost germination

Seed Establishment
Added seaweed creates a stronger and deeper root system

Nutrient Package
Fast & slow release nutrient uptake for continuous support & nutrient holding

Enhances Soil
Beneficial microbes break down thatch and improves soil biology & structure

Water Management
Wetting agent ensures water will be absorbed quicker & more evenly

Adds New Seed

Feeds & Enhances Existing Lawn

How Lawn Revive Works

Micronized granules	Contain a blend of every nutrient which break down on the soil surface when exposed to moisture
Nutrient content	Encourages green growth of the plant, also strengthening and toughening new growth. Contains every essential nutrient for healthy lawns
Beneficial Microbes	Help break down dead organic matter, like thatch and dead moss, making further nutrients available to the grass.
Wetting Agent	The added wetting agent allows water to penetrate even hydrophobic soils, this will encourage the dissolved nutrients to move to the grasses root zone for absorption
Soil improver	Long lasting based soil improvers will be added each time the product is applied, over time they will build up and help to enhance the soil's ability to retain nutrient and promote healthy grass growth.

FREQUENTLY ASKED QUESTIONS

Q. Will this product kill the moss and weeds on my lawn?

A. This product will not kill weeds and moss, but will encourage the lawn to outcompete them over time.

Q. Can I use this to repair the patches on my lawn?

A. Yes this product will be able to repair small patches and thin areas in lawns
