

TECHNICAL FACT SHEET - LAWNS

V4-09/10/18

LAWN SAND²

TRADITIONAL MOSS TREATMENT

For a healthier, greener, moss-free lawn

BENEFIT

- Kills moss quickly
- Greens up lawns

KEY POINTS

- Traditional moss treatment
- Promotes drainage for lawns growing on heavy soils
- Blend of lawn fertiliser and ferrous sulphate that work together to condition your lawn

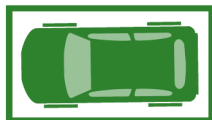

APPLICATION RATE

APPLICATION METHOD	APPLICATION RATE
 Apply by hand or spreader	80g sq. m

Estimate the size of your lawn to prevent over-application using the 'car park space guide' below. Adjust the spreader setting and calibrate to apply the correct rate. Visit www.gardenhealth.com for spreader setting guidance.

Maximum of 2 applications with interval of 40 days

1 CAR PARKING SPACE = 2 METRES x 5 METRES = 10 SQUARE METRES

WHERE TO USE

Apply only to established turf/lawns. DO NOT use on newly sown lawns or newly laid turf until established for one year. DO NOT allow the product to contact the foliage of neighbouring vegetation.

INSTRUCTIONS FOR USE

For use only as a home garden Mosskiller

APPLICATION BY HAND: Mark out areas to be treated. Sprinkle evenly at a rate of 80 g per sq. metre over the marked area. It is good practice to wear gloves when handling this product.

APPLICATION BY LAWN SPREADER: Mark out areas to be treated. Apply evenly at 80 g per sq. metre evenly over the lawn. Use the correct spreader setting or calibrate your spreader to apply the correct amount.

GENERAL ADVICE: Avoid walking on treated areas until it has rained or product has been watered in. If no rain falls within 48 hours of treatment. Water the treated grass. Keep children and pets away from treated areas until granules have been watered in.

WARNING: If spilt on paving, slabs, tiles, decking or clothes/shoes etc., brush off immediately to avoid staining or discolouration. Do not wash surfaces clean as this can cause staining. Take care not to walk on the treated lawn, as walking the granules onto a patio, decking or into the house may stain.

MAPP 17030

PCS 05410

ACTIVE INGREDIENT

14.1% w/w Iron Sulphate Heptahydrate

WHEN TO USE

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC
		✓	✓	✓	✓	✓	✓	✓	✓		

Apply March to October when moss is actively growing. Grass should not be cut 3 days before treatment and not cut again until at least 4 days after treatment. Allow 40 days between applications. **Do not** apply during drought or freezing conditions or when rain is falling or imminent. To avoid drift of granules or dust onto plants, patios or ponds, do not apply in windy weather.

EXPECTED RESULTS

Your lawn should thicken and become a lush green colour. The moss will blacken as it dies. Any blackening of grass is only temporary and will grow out as you continue mowing. Dead moss can be removed by raking or scarify 7-14 days after treatment. Re-treatment may be necessary for heavy infestations.

NUTRIENT CONTENT

Nutrient	Nutrient Content (% w/w)
Nitrogen (N) Total	4.0%
Total Iron (Fe)	2.8%

EXAMPLE OF MOSS TREATED WITH
MOSS KILLER BLACKENING

Moss Control Techniques:

The key to reducing moss is to have an effective all-year round management strategy incorporating the use of Westland Lawn Sand². The following non-chemical techniques can be used to help reduce moss:

- Ensure the turf is healthy, weed, disease and pest free. This can be helped by fertilisation and regular maintenance.
- Aerating of the lawn soil to help encourage the free passage of water and nutrients through the soil.
- Raking/scarifying to remove dead mosses and removal of fallen leaf debris to prevent the build-up of fibrous material which encourages weed and moss growth. Combining these cultural management practices together with applications of Westland Lawn Sand 2 can successfully reduce lawn moss problems.

FREQUENTLY ASKED QUESTIONS

Q. Can my children & pets go into the treated area?

A. Water the product in and allow lawn to dry to prevent the product from being transferred (on paws or shoes) from the lawn to other areas where it may stain.

Q. Why has my grass turned black after applying?

A. It is likely that the grass was wet when applied. The effect is temporary and will improve with subsequent mowings.

Q. Can I use this product on a newly sown/turfed lawn?

A. No, only use on established lawns over one year old.
