

TECHNICAL FACT SHEET - LAWNS

V3-17/09/2021

MOSS MASTER NATURAL MOSS REMOVER & FEED

Feeds for 3 months and removes moss without any blackening.

BENEFIT

- Feeds & greens for 3 months
- No black moss or staining
- No need for raking
- Safe for children, pets & wildlife
- 7 day greening

KEY POINTS

- Enhances lawn & root health
- Indirect action against moss, reducing re-infestation
- Dual action bacteria digests thatch into organic lawn feed
- Organo-mineral fertiliser rich in organic matter & slow release nutrients

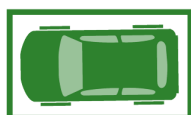

NPK VALUE: 6-6-20 (+3MgO)

APPLICATION RATE

APPLICATION METHOD	APPLICATION RATE—MOSS REMOVAL	APPLICATION RATE—LAWN FEED
Apply by hand or spreader 	100-150g sq. m	45-100g sq. m

Estimate the size of your lawn to help prevent over-application. Adjust the spreader setting and calibrate to apply the correct rate. Visit www.gardenhealth.com for spreader setting guidance.

1 CAR PARKING SPACE = 2 x 5 SQ METRES
= 10 SQUARE METRES

WHERE TO USE

For use on lawns

WHEN TO USE

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC
		✓	✓	✓	✓	✓	✓	✓			

Apply when grass is actively growing from March to September. Repeat after 3 months if required.

BEST CONDITIONS: Apply when the soil is moist and the grass is dry. After cutting the lawn remove the clippings for better contact with soil and moss

EXPECTED RESULTS

After 7 days the lawn will become greener. Dead moss will appear 2-3 weeks after application. There is no need to rake dead moss, as this will be broken down and converted into organic matter.

INSTRUCTIONS FOR USE

APPLICATION: Mark out areas to be treated. Apply granules thinly and evenly to ensure the same result across the entire lawn. Do not exceed the application rate. Apply 100-150 g per sq. metre over lawns infested with moss. To use as a lawn feed only, apply at 45-100 g per sq. m. If using a wheeled spreader, adjust setting and calibrate to apply the correct rate.

TO FINISH: Water granules in well within **48 hours** if no rain falls. We recommend waiting 7-10 days before mowing for maximum effect. Re-treatment may be necessary for heavy moss infestations or if moss returns.

GENERAL ADVICE: Do not exceed the maximum recommended rate of 150 grams per sq. m. To be used only where there is a recognised need. Overdosing with fertiliser can damage your lawn. Children and pets need not be excluded from treated areas.

WESTLAND MOSS MASTER v2

Always read the label and product information before use

NUTRIENT CONTENT	
Nutrient	Nutrient Content (% w/w)
Nitrogen (N) Total	6.00%
Ammoniacal Nitrogen	6.00%
Phosphorus Pentoxide (P₂O₅)	6.00% (2.6% P)
Soluble in neutral ammonium citrate and water (P ₂ O ₅)	
Phosphorus Pentoxide (P ₂ O ₅)	3.10% (1.35% P)
Soluble in water	
Potassium Oxide (K₂O)	20.00% (16.6% K)
Soluble in Water	
Total Magnesium Oxide (MgO)	3.00% (1.8% Mg)
Total Calcium Oxide (CaO)	6.10% (4.36% Ca)
Total Sulphur Trioxide (SO ₃)	44.5% (17.8% S)
Range of Trace Elements	0.67%

Treated moss will turn brown as it dies. It will then be broken down by microbes in the product. The fertiliser in Moss Master greens up the grass and encourages healthy growth. The above image is part of a product demonstration on a lawn with a very high moss infestation.

FREQUENTLY ASKED QUESTIONS

Q. Will I have to rake out the moss after applying Moss Master?

A. No, Moss Master removes moss with no blackening or staining, the dual action bacteria digest any dead moss and thatch and converts it into organic lawn feed.

Q. Can I use this product around my pets and children?

A. Yes, Moss Master can be used as per label advice around pets, children and wildlife.

Q. Can I use this product on a newly sown/turfed lawn?

A. We would not recommend using Moss Master on lawns under one year old.
