

TECHNICAL FACT SHEET - LAWNS

V3-11/01/21

AFTERCUT ULTRA GREEN PLUS

LAWN FEED AND IRON SUPPLEMENT

Feeds and conditions grass from root to tip.

Perfect for a greener, stronger and healthier lawn.

BENEFIT

- Improves lawn health and colour
- No scorch formula
- Helps create a stronger tougher lawn
- Prevents Moss

KEY POINTS

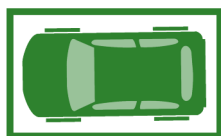

- Added Iron & Magnesium for deep greening action
- Feeds all parts of the plant without a surge in growth
- Promotes tillering for a stronger, thicker lawn
- Manages soil moisture *

APPLICATION RATE

APPLICATION METHOD	APPLICATION RATE
 Apply by hand or spreader	Standard Rate 35g per sq. m
	Increased Rate 50g per sq. m

Estimate the size of your lawn to prevent over-application using car park spacing. Adjust the spreader setting and calibrate to apply the correct rate. Visit www.gardenhealth.com for spreader setting guidance.

1 CAR PARK SPACE = 2METRES x 5METRES
= 10 SQUARE METRES (M²)

WHERE TO USE

For use on lawns

NPK VALUE: 4-1-4 (+ 4Fe)

WHEN TO USE

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC
	✓	✓	✓	✓	✓	✓	✓	✓	✓		

Apply every 3-4 weeks from Feb to October when grass is actively growing. For use on established lawns (3+ months old). For best results apply to the lawn after mowing.

BEST CONDITIONS: Apply when the soil is moist and the grass is dry. Do not use during drought, freezing or windy conditions.

EXPECTED RESULTS After 3 days the lawn will become greener and healthier. Regular applications will create a thicker, hard wearing lawn and help suppress weeds and moss.
* Supplies nutrients and manages soil moisture to create conditions unfavourable for moss growth while at the same time strengthening the grass in the lawn.

INSTRUCTIONS FOR USE

APPLICATION: Apply the granules thinly and evenly to ensure the same result across the entire lawn. Mark out the areas to be treated. The standard application rate is **35g per m²**. However, in early spring and autumn the rate of application can be increased to **50g per m²** to boost the lawn and to aid with crowding out moss.

BY HAND: Apply the product at the correct amount evenly over the marked area.

BY WHEELED SPREADER: Use the correct spreader setting or calibrate your spreader to apply the correct amount

TO FINISH: Brush off granules immediately from hard surfaces, decking, clothing and footwear to avoid staining/discolouration. Do not wash surfaces clean as this may cause staining.

GENERAL ADVICE: To minimise scorching risk, water granules in well within 48 hours after application if no rain falls. Some temporary blackening may be seen on heavy moss infested lawns.

FREQUENTLY ASKED QUESTIONS

Q. Can my children & pets go into the treated area?

A. Water the product in and allow lawn to dry to prevent the product from being transferred (on paws or shoes) from the lawn to other areas where it may stain.

Q. After using this product I have some staining on our patio/slabs, what can I use to remove it?

A. Treatments based on oxalic acid have shown to be effective. Try a small inconspicuous area at first to ensure there is no discolouration of the stone surface

Q. Can I use this product on a newly sown/turfed lawn?

A. No, however you can apply Aftercut Ultra Green on lawns over 3 months old.
