

HOW TO ASSEMBLE YOUR HOSE REEL

ASSEMBLE THE DRUM

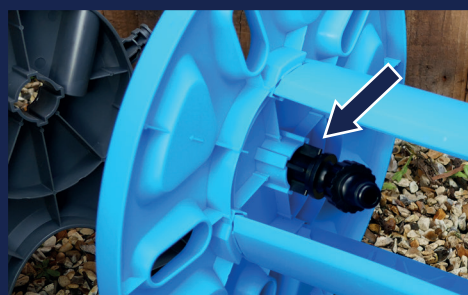

Push firmly and snap fit 2 x drum internal struts into drum and finish by pushing on the other side of the drum.

ASSEMBLE THE FRAME

Take 1 x large side bracket and align with the drum

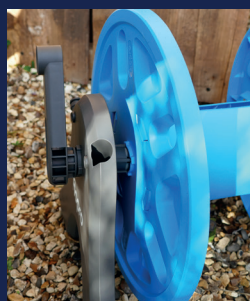

Push the Angled water inlet through the hole in the assembled drum and side bracket

Screw on the Water inlet to the other side of the Angled Water Inlet

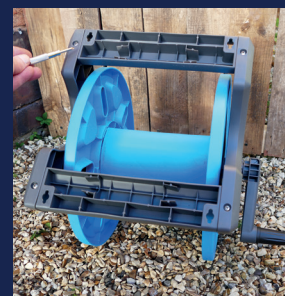

Align the drum and insert the central plastic winding handle through the hole in the frame and into the drum

Push firmly and snap fit the winding handle to the arm

Insert 2 x grey foot plates & attach with 2 x screws per foot.

Insert 2 x metal bars into holes in the frame and secure with 2 x screws per bar

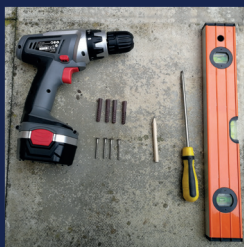

Attach your hose to the drum with a quick fit connector (not supplied)

WALL MOUNT YOUR REEL

STEP 1

You will need a drill, 4 x 5cm screws, 4 x plugs, screwdriver, pencil and spirit level

STEP 3

Ensure reel is level and mark screw holes

STEP 5

Turn screws until approximately 2/3 into wall

STEP 2

Place empty reel on wall, maximum 1 metre away from tap

STEP 4

Drill 4 holes into marked areas and insert plugs

STEP 6

Place reel on screws and tighten screws further
